

Caller ID Blocking Options – *67

Caller ID blocking suppresses your name and number so that the called party with Calling Name and Number does not receive this information. Because there may be occasions when you need to call anonymously, we will automatically equip your line with Per-Call Blocking at no charge.

***67 Per Call Blocking** — By dialing a special code before you place a call, you can prevent your phone number and name from appearing on the Caller ID display of the person receiving your call.

Per Line Blocking — When you request* Per-Line Blocking, you do not need to dial a code to block your name and number each time you place a call. Your number will automatically appear as "Private". To override Per-Line Blocking (allowing your number to be displayed) on an individual call, you must dial a special code before placing the call.

*You must call our office to subscribe to this service provided at NO CHARGE.

How to use Per Call Blocking:

1. Lift the handset and listen for dial tone.
2. Press ***67**. (On a rotary phone, dial 1167).
3. Dial the number you're calling as usual.
4. The person you've called will not be able to see your number displayed on their telephone display screen. Instead, a "P" or "Private" will be displayed.

*Notes: You must dial *67 before each call you place. Otherwise, your phone number will be released to the person receiving your call.*

*If you have requested Per-Line Blocking from your telephone company, you do not need to dial a code to block your number each time. Your number will always appear as "Private". To override Per-Line Blocking (allowing your number to be displayed) on an individual call, dial *82 (on a rotary phone dial 1182) before placing the call. Your name and number may still be delivered when calling 800 numbers.*

Continuous Redial – On *66 / Off *86

You can save time dialing busy numbers over and over. Your phone can keep dialing a number while you go about your business, eliminating wasted time and aggravation. As soon as the line is free, your phone rings you and the call is automatically placed for you.

How to use:

1. When you hear a busy signal, press and release the "switchhook". Listen for a special tone.
2. If you've already hung up, lift the handset and listen for a normal dial tone.
3. Press ***66** (On a rotary phone, dial 1166).
4. If the line is still busy, hang up. Your phone will check the number for up to 30 minutes.
5. A special call back ring alerts you if the line becomes free (some phones ring normally).
6. Lift the handset to automatically place the call.

To cancel your Call back request:

1. Depress the "switchhook" and release. Listen for a special tone.
2. If you've already hung up, lift the handset and listen for a normal dial tone.
3. Press ***86** (On a rotary phone, dial 1186).
4. Listen for the confirmation tone or announcement. Hang up.

Notes: To start the 30-minute clock, repeat steps 1-4 under "How to use".

Continuous Redial can check as many as 31 busy lines at once for you. To know which call is being completed, you must subscribe to Calling Name and/or Number Identification.

Does not work on 800 numbers, 900 numbers outside the specified service area, or on lines where Call Forward and some other call services have been activated.

The "switchhook" is the button the handset pushes down when you hang up the phone. Some telephones have a Link or Flash key you can press instead.
