

Long Distance Security Code

To set up personal security code

First you need to make a long distance call with the initial pass code (0000) for it to be set up in the system. To do this: press # + 0000, (on a rotary phone, dial 120000) wait for the new dial tone, then dial your long distance number 1-____-____-____.

After making a long distance call with the security code 0000, you can then set up your own personal 4-digit security code:

1. Pick up the handset and listen for a dial tone.
2. Press the Star Key * then 97 + 0000, (on a rotary phone, dial 11970000) then the four numbers you want as your personal security code.
3. Listen for confirmation beep & hang up the phone.
4. Pick up the hand set & listen for dial tone & press the Redial button or input the same numbers again (* + 97 + 0000 + personal 4-digit code)(on a rotary phone, dial 11970000 plus personal 4 digit code).
5. You will hear a double ring back tone.
6. Hang up the phone. Your instructions are complete for setting up your personal security code.

To dial out with your Long Distance Security Code:

1. Listen for dial tone & press # then your personal four digit security code, (on a rotary phone, dial 12 then your personal four digit security code).
2. Listen for new dial tone & then dial your Long Distance number 1-____-____-____. If you forget your code call 783-2200 for Customer Service.

**FOR YOUR OWN PROTECTION SAFEGUARD YOUR
LONG DISTANCE SECURITY CODE.**

Nemont's float traveled the service area to take part in local parades.
